CD Portable

AZ7337

Standard product information

CD Player

• 12-Second Electronic Skip Protection (ESP)
Automatically stores 12 seconds of music information during play to prevent interruptions caused by shock or vibration.

• 25-Track Programmable
Store up to 25 of your favorite CD track selections to be played back in the order in which they are programmed.

• Shuffle Play
Plays all selections on a disc in random order, ignoring the sequential order in which they were originally recorded.

• Bitstream Digital-to-Analog Conversion
The most accurate method of Digital-to-Analog conversion, Bitstream converts information one bit at a time. A single "1" or a single "0" is processed rather than a combination of 16 "1"s and "0"s at once. Since this 1 bit converter must choose from only one of two possible values, instead of 65,536 as with a 16 bit converter, there are no errors.

• 192x Oversampling
Provides digital filtering to reduce noise and contributes significantly to the sound purity of compact discs.

• Next/Previous Track Search
This two button feature offers the opportunity to go back to the previous track or go forward to the next track instantly.

• Repeat One/All
Selection of this feature repeats one track or all of the tracks on one disc based on user preference.

• Introscan
Plays the first ten seconds of each track on a disc providing a quick overview of the disc contents. Play can be started at any time by pressing the PLAY button.

• Search with Sound
Audible "bits" of sound can be heard while searching backward or forward within any CD track, while in PLAY mode.

• Auto Power Off
Automatically turns off the system at the end of a digital compact disc.

• Resume
Allows play to restart where it was stopped. In this mode, the CD player memorizes the last played position on a disc. Then, as long as the lid has not been opened, upon pressing the PLAY button, the laser mechanism returns to the last played position and resumes play.

• Hold Switch
Activating this feature deactivates all other function buttons until the HOLD button is pressed again, thereby preventing interruption of the music should another button be pressed accidentally.

Sound/Speakers

• Digital Sound Processing
DSP offers different sound settings optimized for specific musical styles. Examples are CAR, POP, ROCK and Incredible surround™ settings, each specifically tailored to produce optimum listening pleasure for its corresponding style of music.

• Lightweight Stereo Headphones
Enjoy the ultimate stereo listening experience with comfortable, lightweight stereo headphones that can be conveniently connected to the stereo headphone jack.

• Rotary Volume Control
For smooth, linear volume adjustment.

Additional Features

• Wireless "Credit Card" Remote Control
Approximately 2" x 3.25" x 0.25" this ultra slim remote control can access volume up/down, mode, skip, next, previous, and many other functions of this personal, portable CD player.

• Illuminated Six-Digit LCD Display
A state-of-the-art Liquid Crystal Digital (LCD) readout displays CD track numbers and other vital information so you can check feature status at a glance. Backlit illumination makes it easy to read at any time of day.

• Heat and Scratch Resistant Cabinet
Unique plastic resin composition allows this model to withstand extremely high temperatures.

• Line Out/Headphone Jack
Enjoy your favorite CD with full, rich stereo separation or connect it to the input of a stereo amplifier for greater versatility.

• AC/DC Operation
For convenience this feature can't be beat. Listen to your favorite artists any time or anywhere using the detachable AC power cord or batteries available at any corner store.

• Operates on Two AA Batteries
Two AA batteries provide hours of uninterrupted music enjoyment anywhere you want to go.

• Seven Hours Playing Time
For maximum listening pleasure this model provides up to seven hours of uninterrupted music on just one set of batteries.

• Car Accessories Included
Car cassette adaptor and cigarette lighter DC adaptor.
